

React Much?

Learning React Basics
by Making Your Own Pokedex App

About the speaker

I am just another guy who is into development, tech blogging, self-help blogging, podcasting, mentoring, teaching, startups, community building, but most of it, still exploring life ^.^

Find the slides at: madhavbahl.tech/poke-ppt

Before we start...

```
npx create-react-app react-pokedex  
cd react-pokedex  
npm start
```

Download the boilerplate code -

Why Meetups and Webinars?

When you can learn everything on Google!

Find like minded people, network with them, increase your knowledge!

A chance to discuss about new trends, topics and advancements in tech

Today's Agenda

1. Why React?
2. Basic Concepts of React
 - a) components
 - b) one way data flow
 - c) JSX
 - d) state
 - e) props
 - f) life cycle method
3. Architecture for our app
4. Let's start coding!
5. Deploying our react app

1. Why React?

1. Fast Learning Curve
2. Reusable Components
3. Fast Render With Virtual DOM
4. Great Dev Tools
5. Great Dev Community
6. Proper Modularization
7. Clean Abstraction
8. React Native, React Desktop

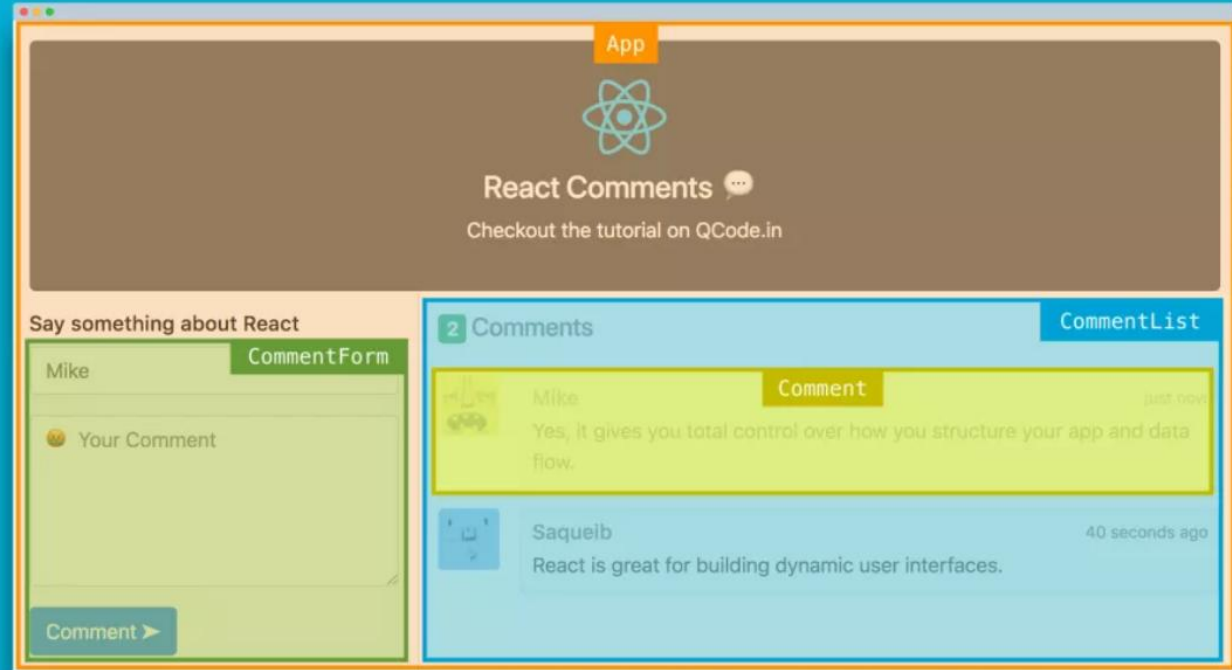

Part 2

Basic Concepts of React

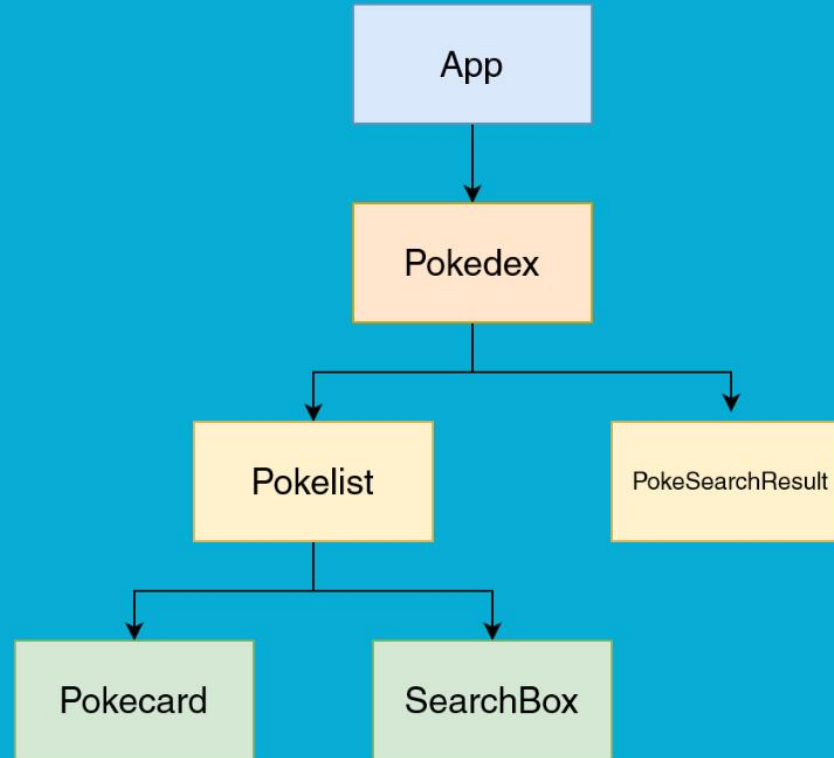

A) Components

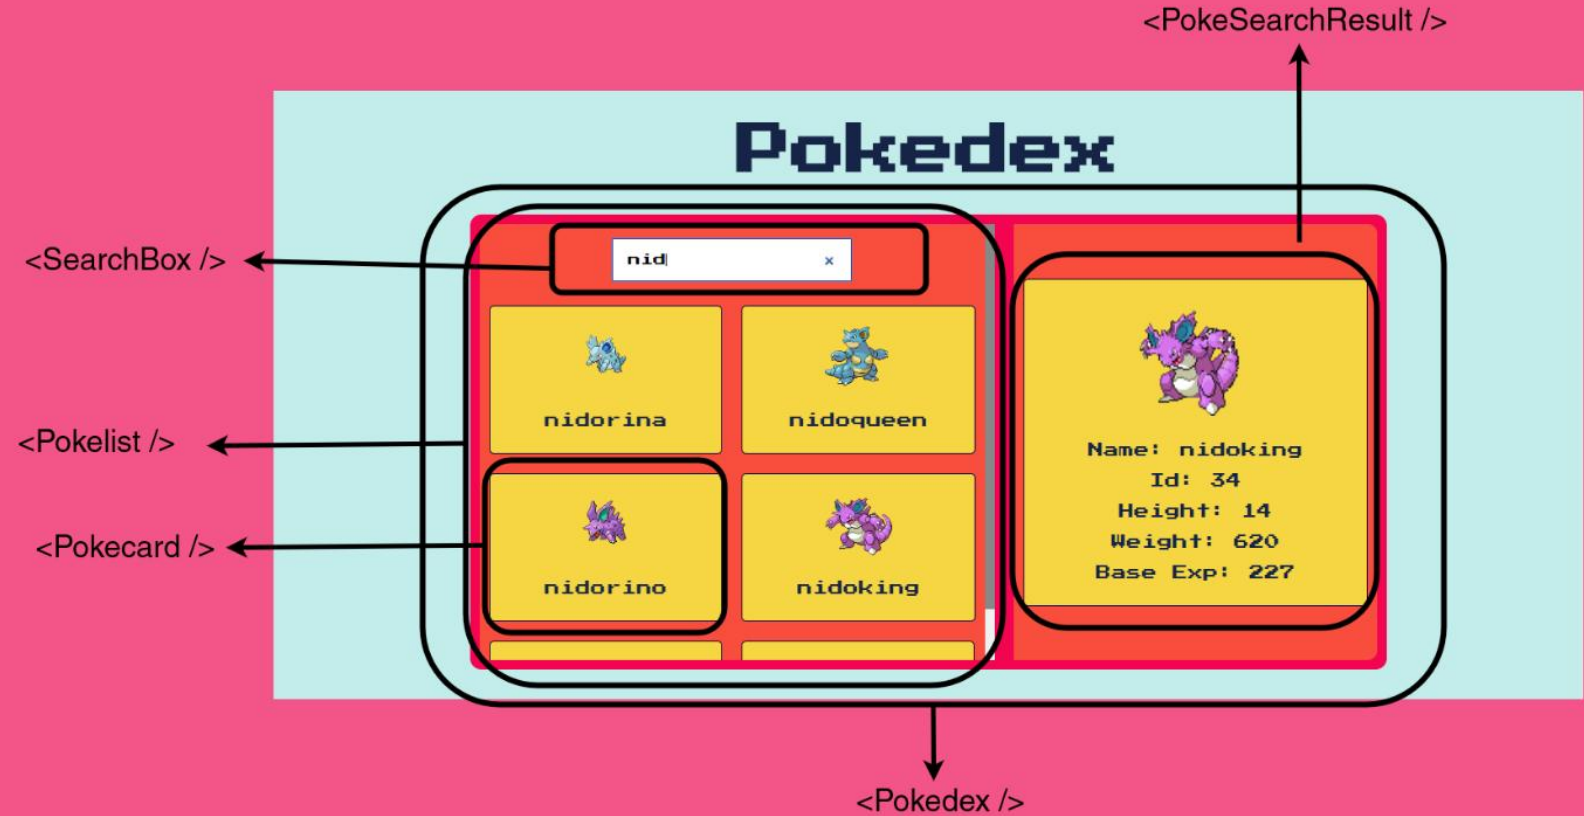

B) One Way Data Flow

3. App Architecture

Part 4

Let's Start Coding

5. Deploying the app

1. `npm install gh-pages`

2. Homepage

```
"homepage": "http://madhavbahl.tech/pokedex-private/",
```

3. Scripts

```
"predeploy": "yarn build",
```

```
"deploy": "gh-pages -d build"
```

4. `npm run deploy`
